

FPA Test Report

QF6-41
320x256

PARAMETER	VALUE	UNITS	CRITERIA	PASS/FAIL
Active array size	320 x 256	-		
F/number	4	-		
ROIC	ISC9705			
Mux gain setting	2	-		
Integration time [†]	16.35	ms		
Frame rate	50	Hz		
FPA Temperature	68	K		
QWIP bias	1.4	V		
Aperture-corrected DC output μ	1604.8	mV		
Aperture-corrected DC output σ	50.1	mV		
Aperture-corrected DC output σ/μ	3.1	%		
Aperture-corrected DC output failures	26	-	> \pm 300 mV	
Differential response mean μ	49.3	mV/ $^{\circ}$ C		
Differential response st. dev. σ	0.8	mV/ $^{\circ}$ C		
Differential response σ/μ	1.6	%	< 5 %	PASS
Blackbody responsivity [‡]	14.4	mA/W	@ 1 V bias	
Differential response failures	8	-	> \pm 20 % of μ	
Temporal NE Δ T mean μ	17.2	mK	< 30 mK	PASS
Temporal NE Δ T std. dev. σ	2.6	mK		
Temporal NE Δ T σ/μ	15.4	%		
Temporal NE Δ T failures	1	-	> 70 mK	
Spatial NE Δ T mean μ	11.1	mK	< 30 mK	PASS
Spatial NE Δ T std. dev. σ	9.2	mK		
Spatial NE Δ T Failures	8	-	> 100 mK	
Conversion efficiency mean μ	4.6	%	@ actual bias	
Conversion efficiency st. dev. σ	0.08	-		
Conversion efficiency σ/μ	1.6	%		
Post NUC uniformity (σ/μ)	0.054	%		
ROIC power dissipation	34.1	mW	< 45 mW	PASS
Composite number of bad pixels	26	-		
Composite operability	99.968	%	> 99.5 %	PASS
Forbidden clustered failures?	No	-	No	PASS
Overall status		-		PASS

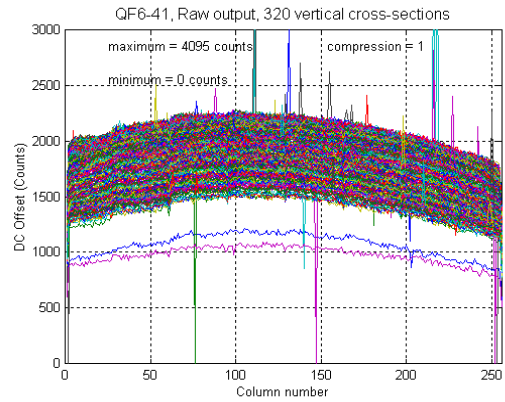

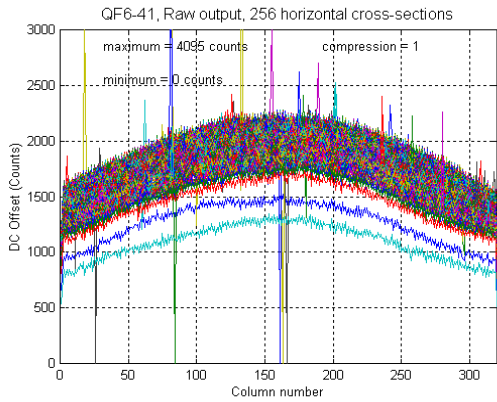

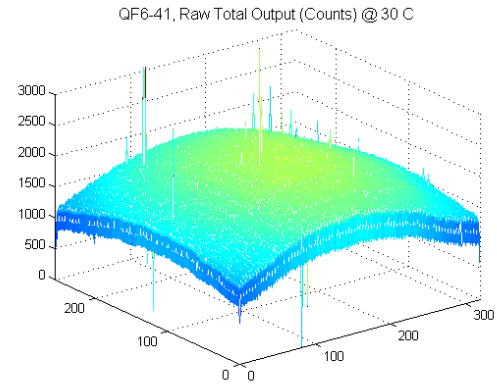

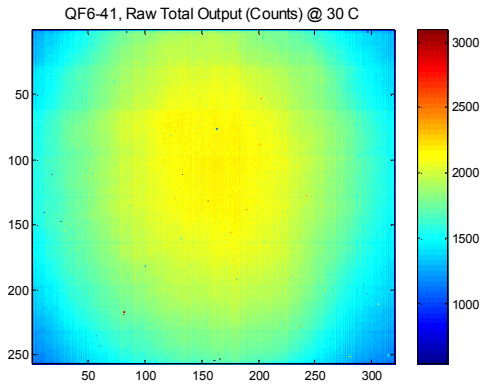

[†] Bias and/or integration time adjusted to fill the well to 75% of total capacity when FPA is exposed to BB source set to 50 $^{\circ}$ C

[‡] Normalized to 1-V bias and unity mux gain.

COMMENTS:

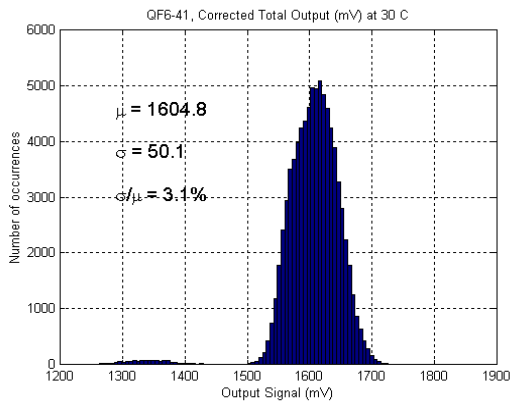

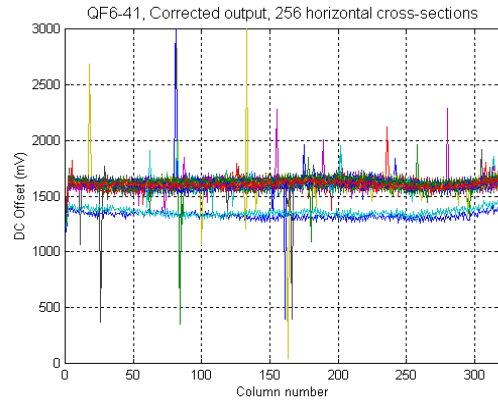

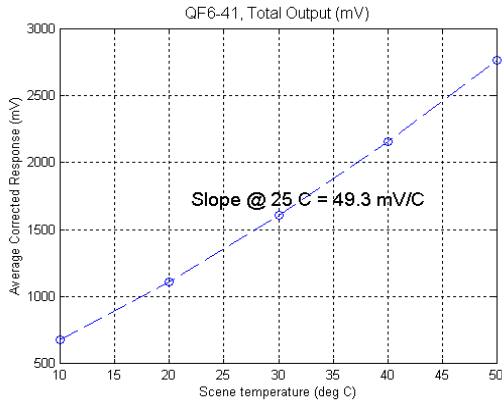

QF6-41

Uncorrected DC Offset Output @ 30°C Dark current + photocurrent at 30-C scene temperature

QF6-41

Aperture-corrected DC Output @ 30°C Dark current + photocurrent at 30-C scene temperature

QF6-41

Aperture-Corrected Differential Response @ 25°C Photocurrent only (difference signal between 2 scene temperatures)

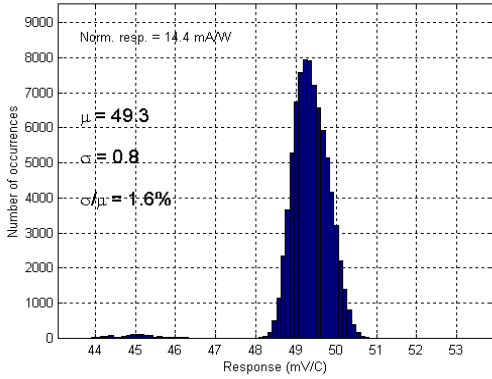

QF6-41, Corrected Differential Response(mV/C) @ 25 C

QF6-41, Corrected Response, 256 horizontal cross-sections

QF6-41, Corrected Differential Response (mV/C) at 25 C

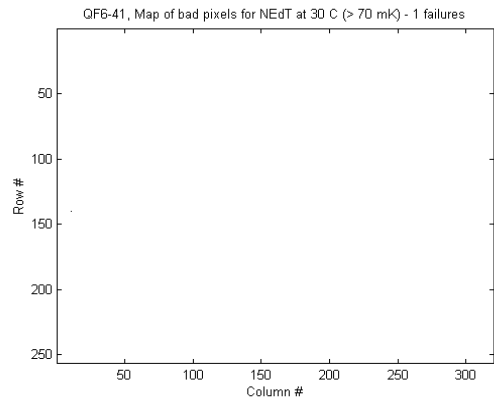

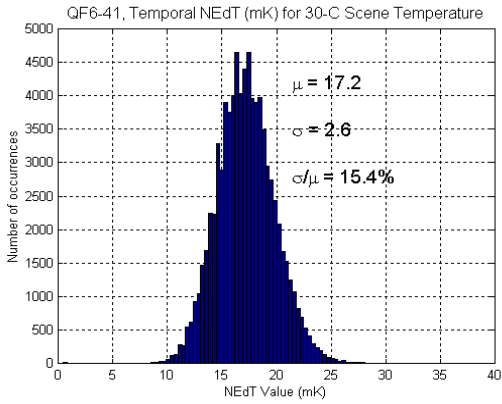

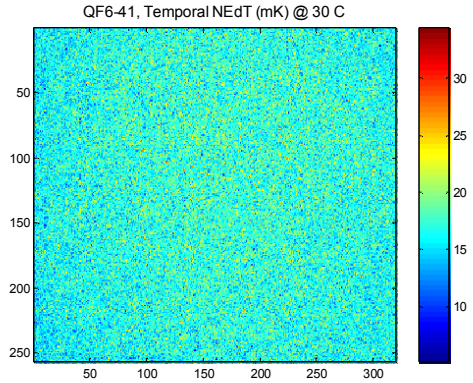

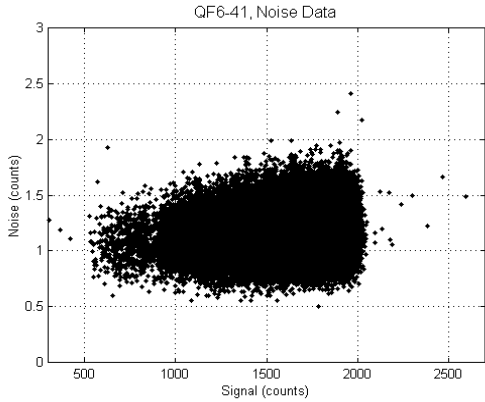

QF6-41, Map of bad pixels for response (+/-0.2 μ) - 8 failures

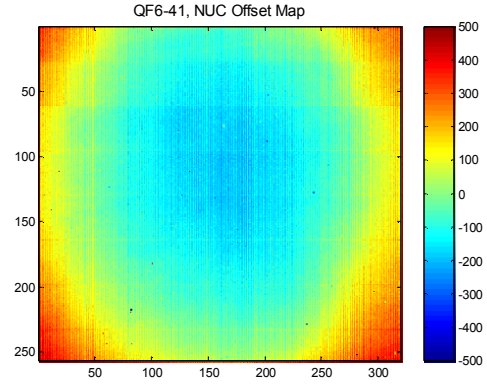

QF6-41

Temporal NEAT @ 25°C

QF6-41

Two-point NUC of Raw Output

QF6-41

Spatial NE Δ T @ 25°C
